1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

[illegible][illegible]

Figure 1 is a schematic representation of the experimental design. It shows a sequence of events: a subject is presented with a stimulus (a red dot), then a fixation cross, and then a response (a red dot). The response is followed by a feedback screen showing the correct answer (a red dot) and the subject's response (a red dot). The sequence is repeated for multiple trials.
